

AVATAR Stock Control

Overview

Stock Control is a multi-currency module providing a complete history of stock movements and powerful warehouse management functions greatly improving efficiency in this resource intensive area.

This module is designed to be seamlessly integrated with other AVATAR modules such as Sales Order Processing, Purchase Order Processing and Subscriptions.

Key features include:

- Maintenance of separate book, journal and non publishing related products
- complete history of stock movements
- validation of ISBN/ISSN numbers
- support for multiple warehouses
- consignment stock control and warehouse picking/packing options
- Batch processing of receipts, issues, adjustments, returns, transfers
- Enquiries by depot or product to view stock levels, movements, orders
- Across the board price uplifts
- Author/Contributor Maintenance

The Stock Control module provides a large number of standard reports and is designed for integration with AVATAR's Business Intelligence tools for user-specific reporting. Standard reports include

- Stock Valuations by Specific Depot or Combined
- Stock Movements including
- Analysis
- Movement
