

AVATAR Title Management

Overview

The Title Management module provides the ability to control all aspects of title production.

Title Management can be seamlessly integrated with other AVATAR modules such as Nominal Ledger and Stock Control.

Key features include:

- Multiple title maintenance
- Title sub-grouping
- Title production schedules
- Staff activities per schedule
- Detailed costing of multiple titles
- Ability to hold many title schedules for cost analysis
- Royalty information per schedule
- Enquiry on individuals current activities
- Workflow and diary functionality

AVATAR Title Management provides a large number of standard reports and is designed for integration with AVATAR's Business Intelligence tools for user-specific reporting. Standard reports include:

- Schedule comparison
- Current schedules
- Overdue schedules
- Completed schedules
- Diary analysis reports
- Activities per user / staff member
